For Carrying out a Detail Study

For Establishment of NTA's Computer Emergency Response Team (NTA-CERT)

1. Background:

Nepal Telecommunications Authority (NTA) is the sector specific regulatory body of the Government of Nepal (GoN) established under Telecommunication Act, 2053 for the development of the telecom/ICT sector. It has the responsibility to make the Telecom/ICT services reliable, accessible and affordable to all the citizens of Nepal.

NTA is also responsible for making policy decisions on overall Telecom/ICT security related issues. Therefore, Nepal Telecommunications Authority (NTA) has formulated "Cyber Security Byelaw, 2020", exercising the powers conferred by Section 62 of the Telecommunication Act, 2053 (1997) for the implementation of cyber security standards and best practices so as to protect ICT Infrastructure and Information Systems of Telecom/ICT Service Providers of Nepal from various malicious attacks and threats; and build trust and confidence of users towards using ICT technology and services.

The age of information and communication technology has made it possible for information and communications to be processed quickly. The cyber space has allowed the creation of virtual communities. Because of the vastness of the virtual environment, Cyberspace has exposed to various variables of threats, risks and vulnerabilities. The increase of cyber-attacks, incidents and events globally, is affecting individuals and organizations alike, whether accidental or deliberate. These incidents and events may have minimal to catastrophic adverse effect to the individual, group or organization, depending on the impact. Therefore, Information Security has become a major concern for everyone.

Amidst the COVID-19 situation in Nepal, more cyber-attacks to ICT infrastructure and incidents are happening with more services being online. The cyber-attacks and incidents are increasing with the increase of broadband penetration and digital services. The speed and efficiency in responding to any information security incident or event is crucial for containment, controlling and minimizing the associated costs in order to maintain, recover or ensure the continuity of operations at a normal or acceptable environment. In this regard, the establishment of Computer Emergency Response Team (CERT) has become essential. NTA, therefore, intends to engage a Consulting Firm to draft and develop "Detail Project Report (DPR) for Establishment of Computer Emergency Response Team (CERT)" for Telecom/ICT/ICT Industry.

2. Objective:
